- Database: MySQL, MongoDB
- Frontend Development: React.js, Next.js, jQuery
- CMS and E-Commerce: , Storyblok, Strapi, Adobe Commerce, Magento 2
- Tools: Git, Vault Project,
- Management: Agile, Scrum

EXPERIENCE

Focalworks Solutions Private Limited / Senior Software Developer Navi Mumbai, Maharashtra | MARCH 2021-Present

- Built projects from scratch for Rupa Online, including integrating third-party modules and payment gateways.
- Automated warehouse selection for order fulfillment, reducing manual effort by 80%. Integrated headless architecture (Vue Storefront) into Magento.
- Optimized faceted search filters for TVS Eurogrip, reducing query times by 300ms. Implemented WhatsApp notifications for order completion in Magento.
- Revamped WordPress to Next.js using Storyblok, reducing load times by 3 seconds.
- Engineered microservices using TypeScript, Node.js, and Prisma, connecting multiple applications to a single API, reducing development time by 50%.
- Designed robust admin modules and resolved over 10+ tickets monthly, improving system performance.
- Developed over 15 reusable React components, enhancing maintainability and saving approximately 30 development hours per month.

Techsevin Solution LLP / Web Developer

Mumbai, Maharashtra | MAR 2019 – FEB 2021

- Automated the creation of orders for exchanges and returns in bulk.
- Refactored RMA code, eliminating return-related errors.
- Automated bulk order closure, increasing efficiency.
- Integrated Adobe Analytics, boosting lead generation by 70%.
- Designed and integrated TreoPIM to import products and images via cron jobs. Refactored SMS modules for order updates, shipment, and delivery.
- Developed APIs for mobile apps and integrated Google Analytics for customer shopping behavior insights.
- Built AJAX-based contact forms for improved user experience.

TryCatch Classes / Intern Web Developer

Mumbai, Maharashtra | FEB 2018 – AUG 2018

- Designed "We will be back soon" pages.
- Created a task management dashboard to assign and track tasks for users.
- Generated automated email notifications for job applications.

PROJECT HIGHLIGHTS

- TVS Eurogrip Website Optimization: As a developer, enhanced product recommendation filters using React.js and optimized API calls with Node.js, reducing query time by 300ms. Created a task management dashboard to assign and track tasks for users.
- Next.js CMS Migration: Led the migration of a WordPress site to Storyblok integrated with Next.js, improving page load speed by 3 seconds and enhancing maintainability.
- Rupa Online Automation: Automated warehouse selection using Magento APIs and Mysql, reducing manual effort by 80%, while coordinating backend integration.
- Magento SMS Integration: Refactored SMS modules for order updates using PHP and integrated messaging APIs, increasing notification reliability as part of the backend team.
- Admin Modules Development: Designed and developed admin modules using React.js and Node.js, streamlining frontend-backend communication and resolving over 10 tickets monthly.
