PROFESSIONAL SUMMARY

Senior Software Engineer with 7+ years of experience building scalable, microservices-based applications using Node.js, NestJS, and Next.js. Strong expertise in system design, payment integrations (Paytm, EDC), and high-performance REST/GraphQL APIs. Proven track record of delivering end-to-end solutions for EdTech and ERP platforms—improving performance, scalability, and operational efficiency. Oracle Certified Professional Java Programmer.

TECHNICAL SKILLS

Backend: Node.js, NestJS, Prisma, REST APIs, GraphQL, TypeScript, PHP

Frontend: React.js, Next.js, Vue.js (Storefront), Venia PWA

Architecture: Microservices, Distributed Systems, System Design, Headless CMS

Databases: PostgreSQL, MySQL, MongoDB, Redis (Caching)

Payments & Integrations: Paytm, EDC (Electronic Data Capture), Payment Gateways, WhatsApp API

E-Commerce / CMS: Magento 2, Storyblok, Strapi

Tools & Practices: Git, Agile/Scrum, Vault, Metabase, TypeORM, Adobe Analytics, Google Analytics

PROFESSIONAL EXPERIENCE

Software Engineer — Elyx Digital Pvt Ltd / Eprotect 360 Pvt Ltd

Mumbai, Maharashtra | April 2025 – Present | Client: HubbleHox Technologies

- Architected and delivered a scalable **microservices-based School ERP platform** for 5 MIDC skill development centers, supporting academic, operational, and financial workflows.
- Designed a system of **4 core microservices** with distinct business domains:
 - **Marketing Service:** Student enquiries and registrations; lead-to-enrollment workflows.
 - **Finance Service:** Fee creation, collection, refund processing, Paytm integration, EDC integration, and payment logs.
 - **Academics Service:** Student attendance, teacher workload allocation, and academic operations.
 - **Admin Service:** Role-based access control (RBAC), user authorization, and school onboarding workflows.
 - **Core/Integration Layer:** Inter-service communication, data consistency, and service orchestration.
- Owned end-to-end **Paytm Refund API integration**, enabling automated and reliable refund workflows.
- Designed and implemented **Student Policy and Student Refund modules**, including REST APIs, business logic, and optimized database schema.
- Developed full-stack features using **Next.js (frontend)** and **NestJS (backend)** within a distributed architecture.
- Integrated **EDC (Electronic Data Capture)** systems for secure and efficient transaction handling.
- Built **Metabase dashboards** to track KPIs: payments, refunds, and enrollments.
- Implemented **Redis caching** to improve performance and reduce database load.

Senior Software Developer — Focalworks Solutions Private Limited

Navi Mumbai, Maharashtra | March 2021 – April 2025

- Led development and deployment of **Rupa Online** e-commerce platform from inception, integrating third-party modules and payment gateways.
- Managed **Magento 2.2 → 2.4.5 migration**, owning the end-to-end Go Live process with zero downtime.
- Automated warehouse selection for order fulfilment using **Magento APIs and MySQL**, reducing manual effort by **80%**.
- Integrated **headless architectures** — Vue Storefront and Venia PWA (React) — in Magento, enhancing frontend performance and scalability.
- Optimized faceted search filters for **TVS Eurogrip**, reducing query times by **300ms** and improving product discovery.
- Implemented **WhatsApp notifications** for order completion in Magento, boosting customer engagement.
- Migrated WordPress to **Next.js with Storyblok CMS**, reducing page load time by **3 seconds** and earning client appreciation.

- Engineered microservices using **TypeScript, Node.js, and Prisma**, consolidating multiple apps into a single API and reducing development time by **50%**.
- Designed robust admin modules in **Next.js, NestJS, and TypeORM**; resolved 10+ tickets monthly.
- Developed **15+ reusable React components**, saving approximately 30 development hours per month.

Web Developer — Techsevin Solution LLP

Mumbai, Maharashtra | March 2019 – February 2021

- Automated bulk creation of exchange/return orders for Magento 2 in PHP, reducing manual processing time.
- Refactored RMA code in Magento 2, eliminating return-related data errors.
- Integrated **Adobe Analytics**, boosting lead generation by **70%** using KnockoutJS, PHP, and Vanilla JS.
- Designed and integrated **TreoPIM** to import products and images via cron jobs from third-party connectors into Magento 2.
- Developed **RESTful APIs** for mobile apps and integrated **Google Analytics** for customer shopping behavior insights.
- Built AJAX-based contact forms for improved UX using Vanilla JS and PHP in Magento 2.

Intern Web Developer — TryCatch Classes

Mumbai, Maharashtra | February 2018 – August 2018

- Designed maintenance pages using HTML and CSS.
- Built a task management dashboard in PHP CodeIgniter.
- Generated automated email notifications for job applications in Shopify.

KEY PROJECT HIGHLIGHTS

MIDC School ERP Platform (EdTech / School ERP) | Role: Software Engineer

- Built distributed microservices system supporting academic and financial workflows for 5 centers.
- Designed finance modules (fees, refunds, policies) with secure Paytm and EDC payment integrations.
- Enabled cross-service communication ensuring scalability and fault tolerance.

Rupa Online — Full-Stack E-Commerce Automation | Role: Lead Full-Stack Developer

- Developed platform from scratch with third-party modules and payment gateways.
- Led Magento 2.2 → 2.4.5 migration with zero downtime.
- Automated warehouse selection reducing manual effort by 80%.

TVS Eurogrip — Performance Optimization & API Efficiency | Role: Frontend & API Optimization Developer

- Reduced faceted search query times by 300ms, improving product discovery.
- Implemented WhatsApp order-completion notifications, reducing support queries.

Next.js CMS Migration — Headless CMS & SEO Enhancement | Role: NestJS Full-Stack Developer

- Migrated WordPress to Next.js + Storyblok, reducing page load by 3 seconds.
- Enhanced SEO rankings and user experience, earning client appreciation.

Microservices Development — Scalable API Engineering | Role: Backend & Microservices Engineer

- Developed microservices with TypeScript, Node.js, and Prisma.
- Consolidated multiple applications into a single API, cutting development time by 50%.

CERTIFICATIONS

Oracle Certified Professional Java Programmer (2015)

EDUCATION

Bachelor of Engineering in Computer Engineering

Mumbai University | 2017
